

Dear Parents,

We want to share with you the assessment methodology we recommend to evaluate your child's learning at Orange Learning. We understand that this approach may be different from the traditional educational system that many are accustomed to, so we want to explain the reasons and benefits of assessing **quality of learning** rather than quantity.

What is Quality of Learning Assessment?

Instead of focusing solely on the quantity of content covered or traditional tests, assess how your children apply and demonstrate their competencies in various situations. This approach focuses on the quality of learning, measuring the development of key skills needed for the 21st century, such as creativity, critical thinking, collaboration and accountability.

Reasons for this approach

- 1. Development of Key Competencies:** Our methodology is based on competency-based learning, which seeks to prepare students for the challenges of the modern world. Evaluating quality allows us to observe how your children develop and apply these competencies in practical and real contexts.
- 2. Depth of Knowledge:** We want students to not only memorize information, but to deeply understand topics and be able to make meaningful connections between different areas of knowledge. This promotes more meaningful and lasting learning.
- 3. Relevance and Applicability:** By assessing how students apply their knowledge and skills in practical situations, we ensure that learning is relevant and useful to their children's daily and future lives.
- 4. Integral Development:** This approach considers both the academic and personal growth of students, fostering their motivation, self-evaluation and self-regulation. We want your children to become autonomous learners and responsible for their own progress.

Benefits for Your Children

- **Creativity and Innovation:** We foster originality and innovation, encouraging students to come up with creative ideas and solutions in their work and projects.
- **Critical Thinking and Reflection:** We develop your children's ability to analyze, evaluate and reflect on information and their own learning process.
- **Soft Skills:** Collaboration, communication and responsibility are fundamental skills that are cultivated and valued in our approach.
- **Commitment and Effort:** We evaluate the care, dedication and commitment that your children demonstrate in their daily learning.

Evaluation Criteria

The learning evidence portfolio template we provide to our subscribers includes a rubric with criteria such as effort and dedication, commitment to study, creativity, curiosity and critical thinking, and soft skills. Each criterion is scored numerically, providing a fair and comprehensive assessment of your children's learning.

We are convinced that this approach to assessing the quality of learning will enable your children to develop holistically and better prepare them for the challenges of the future. We value your support and collaboration in this process, and we are here to answer any questions or concerns you may have.

We appreciate your confidence in Orange Learning and your commitment to an education that promotes educational freedom and responsibility for one's own learning.

Sincerely,

Sofía Sanabria

Orange Learning
